### OBSTETRICAL ANATOMY ULTRASOUND:

- 1) The optimal gestational age of a LEVEL I anatomy scan is 21-23 weeks. Patient's appointments should be scheduled during this time frame if at all possible. It may be done as early as 18 weeks but should NOT be done before that.
- 2) Patients need to be told to hold her bladder until after exam. (You do not have to tell them a certain amount of water to drink.)
- 3) Inform the patient that this is for diagnostic purposes ONLY, and we do not offer 3D ultrasound.

At Chattanooga Imaging, we do Level I anatomy scans, please see list below for indications of Level II anatomy scans.

### INDICATIONS FOR LEVEL II ULTRASOUND :

\*\*\*\*\* IF THE PATIENT ANSWERS YES TO ANY OF THE FOLLOWING QUESTIONS, THE PATIENT CANNOT BE SCANNED HERE AND NEEDS TO HAVE A LEVEL II ANATOMY SCAN AT A HIGH RISK FACILITY \*\*\*\*\*
